Summary

Computer Science undergraduate at Nirma University (Class of 2027) with three research papers accepted at international IEEE conferences (CITS 2025, VTC 2025, GLOBECOM 2025) and hands-on full-stack experience building and deploying production-ready MERN-stack applications, including a client website with an integrated AI chatbot and a real-time SaaS voice-agent platform.

Education

B.Tech in Computer Science and Engineering (Minor in AI), Nirma University, Ahmedabad **2023 – 2027**
CGPA: 9.03

Higher Secondary Education (Class XII) – Science, Seth R.J.J. High School, Valsad **Mar 2023**
Marks: 561/650 ACPC Rank: 451

Experience

[Undergraduate Research Assistant] **2025 – 2026**
Dr. Aparna Kumari, Nirma University *Ahmedabad, India*

- **DiabSecure:** Federated-TinyML privacy-preserving framework for diabetes risk assessment using blockchain.
Accepted at IEEE CITS 2025.
- **DriveShield:** FL-based jamming attack detection framework for V2X communication under 6G.
Accepted at IEEE VTC 2025.
- **SDNSecure:** Federated CNN-based traffic analytics and blockchain storage for 6G SDN.
Accepted at IEEE GLOBECOM 2025.

[Full-Stack Developer] **May 4 – Jul 5, 2026**
AICORE SYSTEM – Client: AI Infowave (AI/Tech Consulting) *On-site*

- Independently built and delivered a full company website (frontend + backend) for an AI/tech consulting firm to showcase services and expertise to clients.
- Integrated an AI-powered chatbot to handle visitor queries and guide clients through company services.
- Managed the project end-to-end, from requirements gathering to deployment of a production-ready site.

Projects

[PrimeDine – Restaurant Ordering & Table Management Platform.] | [GitHub](#) | [Live](#)
React.js, Node.js, MongoDB, Socket.io

- Built a full-stack platform to digitize restaurant operations: customers browse the menu, order, check into tables, and reserve for celebrations, while kitchen staff track and update order status live.
- Designed an owner dashboard with live floor layout, menu/staff management, revenue analytics, giving full real-time control over daily operations.

[Voice AI Agent – SaaS Platform for Embeddable Voice Assistants.] | [GitHub](#) | [Live](#)
React, Node.js, Express.js, Socket.io, MongoDB, Gemini API, Voyage AI

- Built a SaaS platform enabling businesses to create, customize, and embed real-time Voice AI Assistants on their websites via a single script.
- Engineered a low-latency voice proxy (Gemini Multimodal Live API) and an automated RAG pipeline for accurate, context-aware conversations, with billing.

Technical Skills

Languages: C, C++, Python, JavaScript

Frontend: React, Tailwind CSS, HTML5, CSS3

Backend & Databases: Node.js, Express.js, MongoDB

Real-time & Integrations: Socket.io, WebSockets, JWT Authentication, OAuth 2.0, Razorpay API

Tools: Git, GitHub, VS Code, Google Colab, Kaggle, Overleaf, Vercel, Render, Hostinger

Achievements & Certifications

Research Publications: Presented research papers at 2 international conferences (IEEE VTC 2025, CITS 2025).

Academic Excellence: Achieved Academic Excellence in Semesters 1, 2, 4, and 6 of Computer Science at Nirma University; awarded Academic Excellence Certificate.

Smart India Hackathon (SIH): Selected in 2024 & 2025; ranked among Top 25 of 80+ teams at institutional level.

Competitive Programming: Solved 500+ DSA problems on LeetCode and Codeforces.
